

BANDO di PARTECIPAZIONE // CALL FOR PARTICPANTS

WORKSHOP INTERNAZIONALE 2012-2013// INTERNATIONAL WORKSHOPS 2012-2013

IN PARTENARIATO CON LA SCUOLA DEL DESIGN //WITH THE SCHOOL OF DESIGN

TITOLO	EMERGING THEORIES, METHODOLOGIES AND APPLICATION IN THE AREA OF DESIGN: SUSTAINABILITY AND SERVICE DESIGN
TEMA	<p>The intensive programme "Emerging Theories, Methodologies and Applications in the area of Design: Sustainability & Service Design" aims to inform participants about integrated novel approaches to design that are not covered in most curricula of design schools.</p> <p>The multidisciplinary character of the IP is based around use tools and methodologies of both service design and design for sustainability while utilizing an underlying epistemological approach which will enable students to better grasp this multidisciplinarity.</p> <p>Additionally, the project-based aspect of the programme will enable students to work in small multinational groups thus fostering the spirit of co-operation needed to successfully engage design. The teaching staff / student ratio allows such a project based teaching approach to be undertaken without compromising the quality of the teaching process. Twenty four incoming students and ten from the coordinating university will be organized into groups and the three incoming teaching staff plus ten from the University of the Aegean will provide both theoretical lectures as well as facilitating a practice based design studio.</p> <p>The project-based aspect of the programme aims to engage students in a 'learning through doing' approach and simultaneously producing a high quality addition to the participating students portfolios. At the same time these projects aim to support the development of innovative services, practices for lifelong learning and sustainability. Additionally the common educational and learning processes and the use of 8 ECTS credits increases the degree of transparency and compatibility between the participating institutions and motivates participating students to produce high level quality work.</p>
