

The list of core light units

LED Lighting Units			Subsidiary Unit
1. Linear Type	2. Edge Type	3. Flat Type	4. PCI (Sharp Air purifiers)
 [Short]  [Long]	 [Square]  [Circle]  [Ring] <p>Possible to change the shape as long as it functions as light-guiding plate</p> <p>The hole is for PCI(Sharp Air purifiers) and possible to combine with it</p>	 Small  large [Square]  Small  large [Circle] <p>Possible to change the shape of lamp shade</p>	 <p>Air inlet for ventilation</p> <p>To enhance the emotional effect, you can also use PCI unit - Sharp Air purifiers as a subsidiary unit For more info – vitsi our website: http://www.sharp-pci.com/en/technology.html</p>

Examples

You can choose one unit from the above list to create your proposal, or you can also choose more than two units to create your unique proposal.
The units can be used as pendant, wall-mount, floor, exterior lamps or etc.

 Suspended	 Inserted	 Wall-mounted	 Mounted onto the pole	 Wall-mounted	 Mounted On the plate	 PCI + light unit
--------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------

Lighting features

Standard color

Incandescent / White

Optional color

RGB colour-changing feature

Apparently LED Colour-changing features evoke emotional responses. You can optionally make use of RGB colour-changing feature as long as it enhances your idea.

How to fix the units?

There are no dedicated socket systems. The units are just light source. You can design its detail as you like

1. Linear Type

3. Flat Type

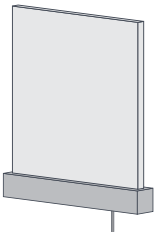

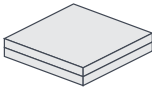

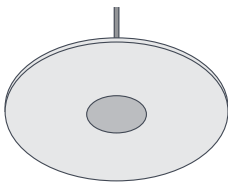

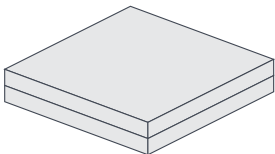

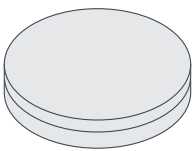

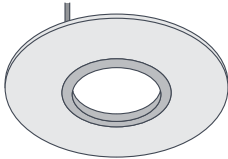

4. PCI (Sharp Air purifiers)

2. Edge Type

Lumen (Incandescent)

1. Linear Type	2. Edge Type	3. Flat Type	
 [Short] 100 lm	 [Square] 450 lm	 [Square] Small 100 x 100 300 lm	 [Circle] Small Ø100 150 lm
 [Long] 300 lm	 [Circle] 600 lm	 [Square] large 200 x 200 1200 lm	 [Circle] Large Ø200 350 lm
	 [Ring] 1200 lm
